Conflict of Interest

of 1.6

The Government of the Republic of Namibia requires that Consultants provide professional, objective, and impartial advice and at all times hold the client's interest's paramount, strictly avoid conflicts with other assignments or their own corporate interests and act without any consideration for future work.

1.6.1 Without limitation on the generality of the foregoing, Consultants, and any of their affiliates, shall be considered to have a conflict of interest and shall not be recruited, under any of the circumstances set forth below:

Conflicting activities

- (i) A firm that has been engaged by the client to provide goods, works or services other than consulting services for a project, and any of its affiliates, shall be disqualified from providing consulting services related to those goods, works or services. Conversely, a firm hired to provide consulting services for the preparation or implementation of a project, and any of its affiliates, shall be disqualified from subsequently providing goods or works or services other than consulting services resulting from or directly related to the firm's consulting services for such preparation or implementation. These are not applicable to the downstream sector

Conflicting assignments

- (ii) A Consultant (including its Personnel and Sub-Consultants) or any of its affiliates shall not be hired for any assignment that, by its nature, may be in conflict with another assignment of the Consultant to be executed for the same or for another Client. For example, a Consultant hired to prepare engineering design for an infrastructure project shall not be engaged to prepare an independent environmental assessment for the same project, and a Consultant assisting a Client in the privatization of public assets shall not purchase, nor advise purchasers of, such assets. Similarly, a Consultant hired to prepare Terms of Reference

relationships**

for an assignment should not be hired for the assignment in question.

- (iii) A Consultant (including its Personnel and Sub-Consultants) that has a business or family relationship with a member of the Client's staff who is directly or indirectly involved in any part of (i) the preparation of the Terms of Reference of the assignment, (ii) the selection process for such assignment, or (iii) supervision of the Contract, shall not be awarded a Contract, unless the conflict stemming from this relationship has been resolved in a manner acceptable to the Client throughout the selection process and the execution of the Contract.

1.6.2 Consultants have an obligation to disclose any situation of actual or potential conflict that impacts their capacity to serve the best interest of their Client, or that may reasonably be perceived as having this effect. Failure to disclose said situations may lead to the disqualification of the Consultant or the termination of its Contract.

1.6.3 No agency or current employees of the Client shall work as Consultants under their own Public Entity(s). Recruiting former government employees of the Client to work for their former ministries, departments or agencies is acceptable provided no conflict of interest exists. When the Consultant nominates any government employee as Personnel in their technical proposal, such Personnel must have written certification from their government or employer confirming that they are on leave without pay from their official position and allowed to work full-time outside of their previous official position. Such certification shall be provided to the Client by the Consultant as part of his technical proposal.

**Unfair
Advantage**

1.6.4 If a shortlisted Consultant could derive a competitive advantage for having provided consulting services related to the assignment in question, the Client shall make available to all shortlisted Consultants together with this RFP all information that would in that respect

The firm achieving the highest combined technical and financial score will be invited for negotiations.
- 5.8 In the case of Fixed-Budget Selection, the Client will select the firm that submitted the highest ranked Technical Proposal within the budget. Proposals that exceed the indicated budget will be rejected. In the case of the Least-Cost Selection, the Client will select the lowest proposal among those that passed the minimum technical score. In both cases the evaluated proposal price according to para. 5.6 shall be considered, and the selected firm is invited for negotiations.

- 6.1 Negotiations will be held on the date and at the address indicated in the **Bidding Data Sheet**. The invited Consultant will, as a pre-requisite for attendance at the negotiations, confirm availability of all Professional staff. Failure in satisfying such requirements may result in the Client proceeding to negotiate with the next-ranked Consultant. Representatives conducting negotiations on behalf of the Consultant must have written authority to negotiate and conclude a Contract.

Technical negotiations

- 6.2 Negotiations will include a discussion of the Technical Proposal, the proposed technical approach and methodology, work plan, and organization and staffing, and any suggestions made by the Consultant to improve the Terms of Reference. The Client and the Consultants will finalize the Terms of Reference, staffing schedule, work schedule, logistics, and

The Client shall prepare minutes of negotiations which will be signed by the Client and the Consultant.

Financial negotiations

- 6.3 If applicable, it is the responsibility of the Consultant, before starting financial negotiations, to contact the local tax authorities to determine the local tax amount to be paid by the Consultant under the Contract. The financial negotiations will include a clarification (if any) of the firm's tax liability in the Republic of Namibia, and the manner in which it will be reflected in the Contract; and will reflect the agreed technical modifications in the cost of the services. In case of Quality and Cost Based Selection, Fixed-Budget Selection, or the Least-Cost Selection methods, unless there are exceptional reasons, the financial negotiations will involve neither the remuneration rates for staff nor other proposed unit rates. For other methods, Consultants will provide the Client with the information on remuneration rates described in the Appendix attached to Section 4 - Financial Proposal - Standard Forms of this RFP.

Availability of Professional staff/experts

- 6.4 Having selected the Consultant on the basis of, among other things, an evaluation of proposed Professional staff, the Client expects to negotiate a Contract on the basis of the Professional staff named in the Proposal. Before contract negotiations, the Client will require assurances that the Professional staff will be actually available. The Client will not consider substitutions during contract negotiations unless both parties agree that undue delay in the selection process makes such substitution unavoidable or for reasons such as death or medical incapacity. If this is not the case and if it is established that Professional staff were offered in the proposal without confirming their availability, the Consultant may be disqualified. Any proposed substitute shall have equivalent or better qualifications and experience than the original candidate and shall be submitted by the Consultant within the period of time specified in the letter of invitation to negotiate.

Conclusion of the negotiations

- 6.5 Negotiations will conclude with a review of the draft Contract. To complete negotiations the Client and the Consultant will initial the Contract. If negotiations fail, the Client will invite the Consultant whose Proposal received the second highest score to negotiate a Contract.

Appendix: Financial Negotiations - Breakdown of Remuneration Rates

(Not to be used when cost is a factor in the evaluation of Proposals)

1. Review of Remuneration Rates

- 1.1 The remuneration rates for staff are made up of salary, social costs, overheads, fee that is profit, and any premium or allowance paid for assignments away from headquarters. To assist the firm in preparing financial negotiations, a Sample Form giving a breakdown of rates is attached (no financial information should be included in the Technical Proposal). Agreed breakdown sheets shall form part of the negotiated contract.
- 1.2 The Client is charged with the custody of government funds and is expected to exercise prudence in the expenditure of these funds. The Client is, therefore, concerned with the reasonableness of the firm's Financial Proposal, and, during negotiations, it expects to be able to review audited financial statements backing up the firm's remuneration rates, certified by an independent auditor. The firm shall be prepared to disclose such audited financial statements for the last three years, to substantiate its rates, and accept that its proposed rates and other financial matters are subject to scrutiny. Rate details are discussed below.
- (i) **Salary**
This is the gross regular cash salary paid to the individual in the firm's home office. It shall not contain any premium for work away from headquarters or bonus (except where these are included by law or government regulations).
- (ii) **Bonus**
Bonuses are normally paid out of profits. Because the Client does not wish to make double payments for the same item, staff bonuses shall not normally be included in the rates. Where the Consultant's accounting system is such that the percentages of social costs and overheads are based on total revenue, including bonuses, those percentages shall be adjusted downward accordingly. Where national policy requires that 13 months' pay be given for 12 months' work, the profit element need not be adjusted downward. Any discussions on bonuses shall be supported by audited documentation, which shall be treated as confidential.
- (iii) **Social Costs**
Social costs are the costs to the firm of staff's non-monetary benefits. These items include, *inter alia*, social security including pension, medical and life insurance costs, and the cost of a staff member being sick or on vacation. In this regard, the cost of leave for public holidays is not an acceptable social cost nor is the cost of leave taken during an assignment if no additional staff replacement has been

_____ Initial

provided. Additional leave taken at the end of an assignment in accordance with the firm's leave policy is acceptable as a social cost.

(iv) Cost of Leave

The principles of calculating the cost of total days leave per annum as a percentage of basic salary shall normally be as follows:

$$\text{Leave cost as percentage of salary}^1 = \frac{\text{total days leave} \times 100}{[365 - w - ph - v - s]}$$

Or

$$\text{Leave Cost} = [(\text{salary} + \text{bonus} + \text{housing subsidy} + \text{transport})/260 \times \text{leave credit days}]$$

It is important to note that leave can be considered a social cost only if the Client is not charged for the leave taken.

(v) Overheads

Overhead expenses are the firm's business costs that are not directly related to the execution of the assignment and shall not be reimbursed as separate items under the contract. Typical items are home office costs (partner's time, nonbillable time, time of senior staff monitoring the project, rent, support staff, research, staff training, marketing, etc.), the cost of staff not currently employed on revenue-earning projects, taxes on business activities and business promotion costs. During negotiations, audited financial statements, certified as correct by an independent auditor and supporting the last three years' overheads, shall be available for discussion, together with detailed lists of items making up the overheads and the percentage by which each relates to basic salary. The Client does not accept an add-on margin for social charges, overhead expenses, etc., for staff who are not permanent employees of the firm. In such case, the firm shall be entitled only to administrative costs and fee on the monthly payments charged for subcontracted staff.

(vi) Fee or Profit

The fee or profit shall be based on the sum of the salary, social costs, and overhead. If any bonuses paid on a regular basis are listed, a corresponding reduction in the profit element shall be expected. Fee or profit shall not be allowed on travel or other reimbursable expenses, unless in the latter case an unusually large amount of procurement of equipment is required. The firm shall note that payments shall be made against an agreed estimated payment schedule as described in the draft form of the contract.

¹ Where *w* = weekends, *ph* = public holidays, *v* = vacation, and *s* = sick leave.

- (vii) **Away from Headquarters Allowance or Premium**
Some Consultants pay allowances to staff working away from headquarters. Such allowances are calculated as a percentage of salary and shall not draw overheads or profit. Sometimes, by law, such allowances may draw social costs. In this case, the amount of this social cost shall still be shown under social costs, with the net allowance shown separately. For concerned staff, this allowance, where paid, shall cover home education, etc.; these and similar items shall not be considered as reimbursable costs.
- (viii) **Subsistence Allowances**
Subsistence allowances are not included in the rates, but are paid separately and in local currency. No additional subsistence is payable for dependents—the subsistence rate shall be the same for married and single team members.

UNDP standard rates for the particular country may be used as reference to determine subsistence allowances.

2. Reimbursable expenses

- 2.1 The financial negotiations shall further focus on such items as out-of-pocket expenses and other reimbursable expenses. These costs may include, but are not restricted to, cost of surveys, equipment, office rent, supplies, international and local travel, computer rental, mobilization and demobilization, insurance, and printing. These costs may be either unit rates or reimbursable on the presentation of invoices, in foreign or local currency.

3. Bank Guarantee

- 3.1 Payments to the firm, including payment of any advance based on cash flow projections covered by a bank guarantee, shall be made according to an agreed estimated schedule ensuring the firm regular payments in local and foreign currency, as long as the services proceed as planned.

The National Energy Fund was established in 1990 by the Petroleum Products and Energy Act of 1990, section 11, subsections 1, and 2, as amended. NEF receives monies from Petroleum levies imposed on controlled petroleum products consumed in the country. The NEF mandate is to equalise the fuel price and collects levies imposed on controlled petroleum products, in terms of the Petroleum Products and Energy Act, Act 13, of 1990 and its amendments.

The Fund also collects money on behalf of the Motor Vehicle Accident (MVA) Fund and National Road Safety Council and remits it to these respective institutions.

The NEF manage and administers the "Slate Account," which is an account between the State and the Suppliers of petroleum products. The purpose of this account is to make payment of under-recoveries to suppliers of petroleum products and receives receipt of over-recoveries from suppliers of petroleum products caused by the international oil prices and the exchange rate fluctuation, among other factors in relation to fixed national pump prices. The NEF funded the construction of the National Oil Storage Facility (NOSF), through a Fuel Strategic levy imposed on Petroleum Products.

The Fund is required to reconcile quantity of petroleum products imports, sales, opening and closing inventory, exports, local and international bunkering activities in the country. This will enable the Fund to determine the arithmetic accuracy for fuel levies income against the monthly petroleum products quantity sales, declared by the Marketing Oil Companies (OMC's) to the Fund. This reconciliation is an integral part of the Fund guaranteeing check and balances of petroleum levies collection processes and safeguarding the Fund's revenue.

To ensure effective and efficient control in the collection process of these levies and in exertion to curb the possibility of tax and levies evasion of the most important commodity, the Ministry through the NEF would like to acquire the service of the Information and Technology firm/company to develop, install and implement the Petroleum Information System (Petroleum Accounting System) in Namibia.

The Petroleum Information System (Petroleum Accounting System) shall be a networked computer-based system developed by technical computer experts or consultants. This development is essential to guarantee a fully integrated petroleum computer system in the

_____ Initial

country. The financial benefits cannot be quantified but will be substantial. The Petroleum Accounting System will monitor and control the Petroleum Products imports, sales, exports, transits, opening and closing inventory as well as local and international fuel bunkering at sea. The successful bidder should adhere to this TOR and in the manner required by the Petroleum Products and Energy Act, 1990 (No. 13 of 1990) and other government legislations.

PART B: OBJECTIVE

NEF requires the services of a reputable and IT experts/ company/firm in Namibia to design, develop, install, and implement the NEF Petroleum Accounting System.

B1. PROJECT DELIVERABLES

The design, development, documentation, and installation of the Petroleum Accounting System should be done with the following careful consideration of various factors to ensure accuracy, efficiency, and compliance with the petroleum industry regulations. Below are some key requirements to consider when designing the NEF Petroleum Accounting System:

B.1.1 Integration with Data Sources: The system should be capable of integrating data from various sources, such as offloading, wholesale operations, transportation/distribution, sales, and retailing. This will ensure that all relevant information is captured accurately and in real-time. Thus, the system should demonstrate reporting capabilities.

B.1.2 Inventory Management: The system should track and report inventory levels throughout the downstream supply chain, from offloading/bunkering, wholesaling, distribution to retailing.

B.1.3 Financial Reporting: The System should generate financial reports, including profit and loss statements, balance sheets, cash flow statements, and other key financial metrics. These reports help stakeholders to understand the financial health of the petroleum business.

B.1.4 Regulatory Compliance: The system must comply with industry-specific regulations and standards, such as those set by the American Petroleum Institute (API), the Securities and Exchange Commission (SEC), and International Financial Reporting Standards (IFRS).

B.1.5 Cost Allocation: The system should be able to allocate costs appropriately to different petroleum activities, such as maintenance, transportation, storage, and distribution.

B.1.6 Taxation: The system should calculate and track various levies and taxes applicable to the petroleum industry, such as excise taxes, fuel taxes, NEF, levies, MVA levy, Road Safety Secretariat levy and other levies imposed on controlled petroleum products.

B.1.7 Data Security and Privacy: As the petroleum industry deals with sensitive data, the system should demonstrate capabilities to handle and deploy robust security measures to protect against data breaches and unauthorized access.

B.1.8 Audit Trail: The System should be able to provide detailed audit trail features, this is essential to track all changes and transactions within the system, ensuring transparency and accountability.

B.1.9 User Access and Permissions: The System should provide role-based user access controls to limit access to sensitive information and functionalities based on each user's role and responsibilities.

PART C: SCOPE OF WORK

NEF Scope of Work for Petroleum Accounting System are as follows:

C1. Designing of Petroleum Information System. The information system should be designed to create a comprehensive and efficient system that manages, and processes data related to various aspects of the petroleum business with reporting capabilities.

C2. Capturing of Petroleum Data and Monitoring Products Movements.

- C2.1 Data Collection:** The system should capture data for fuel imports, exports, local and international bunkering, opening inventory and closing inventory and sales periodically, such as, daily, weekly, monthly and quarterly to enable NEF to conduct monthly petroleum products reconciliation and ensuring security of fuel supply. The system should gather data from various sources, such as sensors, remote monitoring devices, production equipment, personnel, and external data providers. The system should monitor products movements in terms of these activities and provide data to NEF at any given time. This data may include pressures, flow rates, temperature, volumes, inventory levels, market prices, and more.
- C2.2 Data Storage:** The system should demonstrate robust and scalable database necessary to store the collected data. Depending on the volume and complexity of data, databases like SQL, NoSQL, or big data solutions should be considered.
- C2.3 Data Integration:** Integrating data from different sources is essential to ensure a holistic view of the operations. This may require data transformation, data cleansing, and standardization.
- C2.4 Real-time Monitoring:** The system should demonstrate Real-time monitoring and visualization capabilities of key performance indicators (KPIs), these will allow NEF and Petroleum Affairs to track operations' performance and identify potential issues promptly. Ideally interface with the terminal management systems.
- C2.5 Interface Capability with OMC's.** The system should interface with all petroleum wholesalers' activities at Walvis Bay including opening and closing inventory, imports, exports, national sales, transits, vessels arrival, discharge, local and international bunkering for the Fund to have first-hand information. This is mainly for the purpose of collecting fuel levies and ensuring security of fuel supply.

- C2.6 Interface Capability with other Government Agency.** The system should interface with NAMRA system (ASYCUNDA) in relation to Petroleum Products via all entries in the country such as border posts, Luderitz port, Oranjemund and Walvis Bay. The system should monitor products movements at all entries throughout the country including products entering the country via road. The system should also integrate with Namibia Standard Institute (NSI) to provide information through the metering stations as per the NSI requirements to ensure quality and quantity compliance of the data provided into NEF Petroleum Accounting System.
- C2.7 Interface Capability with Inland Fuel Facilities.** The system should provide data to NEF, related to inventory on hand at any given time in the inland facilities around the country. This is mainly to ensure security of fuel supply and curbing fuel smuggling and products adulterations.
- C2.8 Interfacing Capability with Fuel Distributors and Retailers.** The system should be able to provide data related to inventory opening, closing and sales to retailers at various fuel facilities throughout the country at any given time. This is mainly for the purpose of fuel road delivery subsidy paid from NEF to the Fuel distributors and Retailers in far-off destinations. NEF wants to monitor the movement of products within the country and mitigate against illicit fuel trading in and out of the country. Ensuring security of fuel supply situation in the country.
- C2.9 Products Reconciliation Capability Nation Wide.** The system should provide data for products sales from various fuel distributors/ oil companies and fuel facilities to NEF at any given period. This will help the Fund to reconcile volumes declared to NEF by the fuel distributors/transporters to claim fuel subsidy from the Fund.
- C2.10 Integration Capability.** The system should have an integration capability so it can interface with other systems in the supply chain. The system should be able to interface with metering station at NOSF, Walvis Bay and OMC's systems.

C2.11 Data Capturing and Management of Non-Controlled Petroleum Products.

The system should provide non-controlled petroleum products statistics at any given time imports, sales, exports, closing and opening inventories such as Jet A1, Dual Purpose Kerosine (DPK), Paraffin, Heavy Fuel Oil (HFO), Aviation Gasoil (Avgas), Bitumen and Liquefied Petroleum Gas (LPG) for planning purposes only.

C2.12 Data Management: The system should have robust data management capabilities to handle the vast amount of data generated in the petroleum industry. It should be able to collect, store, process, and retrieve data efficiently.

C2.13 Inventory and Supply Chain Management: The system should track and manage the inventory of petroleum products, refined products, and other related materials. It should handle procurement, transportation, storage, and distribution of these products effectively.

C2.14 Haulage, Bunkering, Distribution and Operations Monitoring: The system should monitor and analyze the haulage, bunkering, distribution, and operations processes, including transportation. It should provide real-time data on volumes, equipment status, safety metrics, and environmental parameters.

C2.15 Regulatory Compliance: The system should support compliance with local and international regulations, such as safety standards, environmental regulations, and reporting requirements. It should provide tools to track and document compliance-related activities.

C2.16 Financial Management: The system should handle financial aspects, including accounting, invoicing, revenue management, cost tracking, and financial analysis. It should integrate with other financial systems for seamless financial operations.

- C2.17 **Reporting and Analytics:** The system should provide comprehensive reporting and analytics capabilities. It should generate standard reports on key performance indicators (KPIs), financial metrics, operational data, and other relevant information. It should also support ad-hoc reporting and data visualization.
- C2.18 **Integration and Scalability:** The system should be able to integrate with existing systems, such as enterprise resource planning (ERP), customer relationship management (CRM), and other third-party applications. It should also be scalable to accommodate future growth and expansion.
- C2.19 **Security and Data Privacy:** The system should have robust security measures to protect sensitive data, including customer information, financial data, and operational details. It should comply with data privacy regulations and implement appropriate access controls.

Preface

1. The Standard Contract consists of four parts: the Form of Contract to be signed by the Client and the Consultant, the General Conditions of Contract, the Special Conditions of Contract, and the Appendices. The client using this Standard Contract may NOT alter the General Conditions. Any adjustment to meet project features should be made only in the Special Conditions.
2. Time-based contracts are recommended when the scope of the services cannot be established with sufficient precision, or the duration and quantity of services depends on variables that are beyond the control of the Consultant. In time-based contracts the Consultant provides services on a timed basis according to quality specifications, and Consultant's remuneration is based on (i) agreed upon unit rates for Consultant staff multiplied by the actual time spent by the staff in executing the assignment, and (ii) reimbursable expenses using actual expenses and/or agreed unit prices. This type of contract requires the Client to closely supervise Consultant and to be involved in the daily execution of the assignment.

 - (b) Payment for the Personnel shall be determined on the basis of time actually spent by such Personnel in the performance of the Services after the date determined in accordance with Clause GC 2.3 and Clause SC 2.3 (or such other date as the Parties shall agree in writing), at the rates referred to in Clause SC 6.2(b), and subject to price adjustment, if any, specified in Clause SC 6.2(a).
 - (c) Reimbursable expenses actually and reasonably incurred by the Consultant in the performance of the Services, as specified in Clause SC 6.2(c).
 - (d) The remuneration rates referred to under paragraph (b) here above shall cover: (i) such salaries and allowances as the Consultant shall have agreed to pay to the Personnel as well as factors for social charges and overhead (bonuses or other means of profit-sharing shall not be allowed as an element of overhead), (ii) the cost of backstopping by home office staff not included in the Personnel listed in Appendix C, and (iii) the Consultant's fee.

_____ Initial

- (e) Any rates specified for Personnel not yet appointed shall be provisional and shall be subject to revision, with the written approval of the Client, once the applicable salaries and allowances are known.
- (f) Payments for periods of less than one month shall be calculated on an hourly basis for actual time spent in the Consultant's home office and directly attributable to the Services (one hour being equivalent to 1/176th of a month) and on a calendar-day basis for time spent away from home office (one day being equivalent to 1/30th of a month).

6.3 Currency of Payment

Payments shall be made in the Namibian Dollars.

6.4 Mode of Billing and Payment

Billings and payments in respect of the Services shall be made as follows:

- (a) Within the number of days after the Effective Date specified in the SC, the Client shall cause to be paid to the Consultant advance payments in Namibian dollars as specified in the SC. When the SC indicate advance payment, this will be due after provision by the Consultant to the Client of an advance payment guarantee acceptable to the Client in an amount (or amounts) and in a currency (or currencies) specified in the SC. Such guarantee (i) to remain effective until the advance payment has been fully set off, and (ii) to be in the form set forth in Appendix F hereto, or in such other form as the Client shall have approved in writing. The advance payments will be set off by the Client in equal installments against the statements for the number of months of the Services specified in the SC until said advance payments have been fully set off.
- (b) As soon as practicable and not later than fifteen (15) days after the end of each calendar month during the period of the Services, or after the end of each time intervals otherwise indicated in the SC, the Consultant shall submit to the Client, in duplicate, itemized statements, accompanied by copies of invoices, vouchers and other appropriate supporting materials, of the amounts payable pursuant to Clauses GC 6.3 and GC 6.4 for such month, or any other period indicated in the SC. Separate statements shall be submitted in respect of amounts payable in foreign currency and in local currency. Each statement shall distinguish that portion of the total eligible costs which pertains to remuneration from that portion which pertains to reimbursable expenses.
- (c) The Client shall pay the Consultant's statements within sixty (60) days after the receipt by the Client of such statements with supporting documents. Only such portion of a statement that is not satisfactorily supported may be withheld from payment. Should any discrepancy be found to exist between actual

payment and costs authorized to be incurred by the Consultant, the Client may add or subtract the difference from any subsequent payments. Interest at the annual rate specified in the SC shall become payable as from the above due date on any amount due by, but not paid on, such due date.

- (d) The final payment under this Clause shall be made only after the final report and a final statement, identified as such, shall have been submitted by the Consultant and approved as satisfactory by the Client. The Services shall be deemed completed and finally accepted by the Client and the final report and final statement shall be deemed approved by the Client as satisfactory ninety (90) calendar days after receipt of the final report and final statement by the Client unless the Client, within such ninety (90) day period, gives written notice to the Consultant specifying in detail deficiencies in the Services, the final report or final statement. The Consultant shall thereupon promptly make any necessary corrections, and thereafter the foregoing process shall be repeated. Any amount, which the Client has paid or caused to be paid in accordance with this Clause in excess of the amounts actually payable in accordance with the provisions of this Contract, shall be reimbursed by the Consultant to the Client within thirty (30) days after receipt by the Consultant of notice thereof. Any such claim by the Client for reimbursement must be made within twelve (12) calendar months after receipt by the Client of a final report and a final statement approved by the Client in accordance with the above.
- (e) All payments under this Contract shall be made to the accounts of the Consultant specified in the SC.
- (f) Payments in respect of remuneration or reimbursable expenses, which exceed the cost estimates for these items as set forth in Appendices D, may be charged to the respective contingencies provided for in Namibian Dollars only if such expenditures were approved by the Client prior to being incurred.
- (g) With the exception of the final payment under (d) above, payments do not constitute acceptance of the Services nor relieve the Consultant of any obligations hereunder.
